

# Overall project plan

## February 2022 update

### Catalog Excel format

Last use by a customer: XXX. However, they were not interested in the process decomposition, they needed something simpler and with only the financial indicator. We finally created a dedicated tool because Carbon Bounty did not fit their needs.

### Carbon Bounty Prototype

- Work on the activity description page on Figma:
- Inference of needs / use cases:
  - o Investigation into the feasibility of the inference engine via artificial intelligence algorithms. We will finally use a keyword base per use case, and we will propose the most probable use cases according to the description entered by the user
  - o Preparation of use cases and keywords
  - o Contractualization of the service in progress with XXX

### Database of Sobr-IoT connected solutions

- Deployment of the landing page planned in March
- Development in progress on WordPress
